EDUCATION

Year	Degree/Exam	Institute	GPA
2021 - 2025	B.TECH in Computer Science	HITAM Hyderabad	8.41/10
June, 2020 - Jun, 2021	Class 12	Kendriya Vidyalaya, Kanpur	75%
June, 2018 - Jun, 2019	Class 10	Kendriya Vidyalaya, Kanpur	83%

INTERNSHIPS

- **Navodita Infotech (May 2024) :**
With Navodita Infotech built a Natural Language Processing (NLP) for Text Classification with ML: In which we are Creating a text classification model for sentiment analysis, using NLP techniques using twitter dataset to tell whether the tweet has a positive or a negative emotion.
- **DigiQuanta (Sept 2024 - Present) :**
As a Cybersecurity Intern with DigiQuanta, I am involved in analyzing logs, vulnerabilities and implementing security measures for enhanced network security and data protection. I collaborate on assigned projects, gaining hands-on experience in cybersecurity.

PROJECTS

- **Interactive Hand-Cricket game :**
The C program allows two players to engage in a hand cricket game with options for fixed overs or play until out. It involves a coin toss to decide the batting order, where players take turns batting and bowling, generating random scores.
- **Stable Diffusion Inpainting with Segment Anything :**
The objective of this project is to develop a stable diffusion inpainting method using the Segment Anything Model (SAM). The scope of this project includes exploring the capabilities of SAM and its potential applications in various fields such as image processing, computer vision, and more.
- **Smart Contract Security Analyser using ML :**
Developed a robust machine learning framework to automate the detection of vulnerabilities in Ethereum smart contracts, integrating BiLSTM and CNN techniques. The project aimed to enhance the security and reliability of smart contracts by identifying security flaws, thereby reducing potential financial losses and increasing trust in blockchain technologies.
- **Jcrypt Tool :**
Developed a data security tool, Jcrypt, featuring File Encryption and Image Steganography as separate functionalities. File Encryption allows secure encryption and decryption of sensitive files, while Image Steganography enables users to hide text within images. This project, designed with a user-friendly interface, uses Python, cryptography, and GUI design to cater to users of all skill levels.

SKILLS

- **Languages :** C, Python, Pandas, MySQL, Linux, Machine Learning, Data Structures AND Algorithms
- **Databases :** MySQL, MongoDB
- **Platforms used :** Vscode, Google collab, Jupyter Notebook, Eclipse

ACHIEVEMENTS

- **Leetcode** [Link](#)
- **HackerRank** 4 star in Python [Link](#)
- **Codechef** [Link](#)
